Let our experienced, knowledgeable and insightful team of experts deliver value-adding solutions to help you improve quality, reduce costs and boost productivity.
Each year, we spend thousands of hours on the plant floors of rubber processors, giving our technical experts insight into the industry’s toughest production challenges. In our world-class laboratories dedicated to the rubber industry, we apply this insight to developing solutions that improve your operating efficiency.

**INNOVATIVE SOLUTIONS**

Our line of processing aids includes:

- **Mold release agents** Chem-Trend’s complete line of products includes water-based or solvent-based, conventional mold release agents or Mono-Coat® semi-permanent release agents to address the unique challenges of various rubber molding applications. Our mold release agents offer improved release, better rubber-to-metal bonding, improved rubber flow and many other benefits.

- **Mold protectors** Even the highest-quality molds can become damaged or weak havoc on your operations if not properly maintained. Chem-Trend’s mold protectors keep your molds clean and operating efficiently, even after short-term or long-term storage. Our high-quality mold protectant products offer excellent protection from rust and improved start-up to enhance efficiency, scrap rates, part quality, downtime and operational costs.

**INDUSTRY KNOWLEDGE FOR MAXIMUM EFFECTIVENESS**

Rubber molding is demanding and a mistake made in the de-molding process can be costly. As your partner, we understand how challenges, such as expensive new rubber compounds, can affect your bottom line. With our understanding of the industry’s complexities and trends, we can offer the most effective solutions for your needs. The development of new chemical technologies in our own laboratories further extends our ability to formulate solutions that are most effective for the challenges of rubber molding. During product development, we simulate your production environment, enabling us to evaluate and ensure optimal quality and performance.

**A REPUTATION FOR SUCCESS**

For more than 50 years, Chem-Trend has been a global leader in the development of solutions for molding and casting process challenges. We have a singular focus on developing chemical specialties for processing. Because we are so focused, we can deliver exceptional value, performance and dependability in all we do.

The development of new chemical technologies in our own laboratories further extends our ability to formulate solutions that are most effective for the challenges of rubber molding. During product development, we simulate your production environment, enabling us to evaluate and ensure optimal quality and performance.

**GLOBAL LOCATIONS FOR LOCAL SERVICE**

As a global supplier singularly focused on mold processing solutions, we operate from offices, manufacturing facilities and distribution partners in all industrialized regions of the world, providing local sales and technical support wherever you need us.

**MANUFACTURING EXCELLENCE**

We are committed to excellence in all aspects of manufacturing. We are leaders in quality manufacturing practices, environmental standards and health and safety management systems. Our facilities hold the following certifications:

- ISO-9001
- ISO-14001
- OHSAS-18001

**Our superior products are rooted in our manufacturing and technical expertise, understanding of rubber molding operations, deep industry insight and specialized laboratory resources.**
