Let our experienced, knowledgeable and insightful team of experts deliver value-adding solutions to help you improve quality, reduce costs and boost productivity.
Our solutions will enhance your bottom line by:

- Improving quality
- Reducing costs
- Boosting productivity

**INNOVATIVE SOLUTIONS**

Chemlease® and Zyvax®, Chem-Trend brands, offer a complete range of mold release systems developed to improve composites molding processes. By offering both Chemlease® and Zyvax® brands, Chem-Trend is uniquely positioned to fully support the wide range of composites applications, including aerospace, automotive, construction and industrial, marine, recreational goods, wind energy and more.

Our Chemlease® and Zyvax® product lines include:

- **Release agents** Quality, cost and efficiency depend on successful removal of the composite piece from the mold. Chemlease® and Zyvax® mold cleaners thoroughly and safely aid the removal of mold buildup, including wax, silicone, contaminants and resin, from pre-production and in-line mold applications.

- **Sealers and primers** Chemlease® and Zyvax® mold sealers and primers work in unison with our release agents to protect your mold, offering enhanced surface finish and extended release film life. Chemlease® and Zyvax® primers are available for gloss and matte surface finishes.

**CONVENTIONAL TECHNOLOGY**

When you need high slip, turn to our conventional Chemlease® technology. These products are designed to release the most difficult resins and part geometries. Our conventional products are suitable for high-gloss or non-cosmetic applications in solvent-based and water-based options.

**INDUSTRY KNOWLEDGE FOR MAXIMUM EFFECTIVENESS**

Composites molding is demanding, and a mistake made in the de-molding process can be costly. As your partner, we understand these challenges and the varying requirements for surface finish and post-molding operations. With our understanding of the industry’s complexities and trends, we can offer the most effective solutions for your needs.

The development of new chemical technologies in our own laboratories further extends our ability to formulate solutions that are most effective for the challenges of composites molding. During product development, we simulate your production environment, enabling us to evaluate and ensure optimal quality and performance.

**A REPUTATION FOR SUCCESS**

For more than 50 years, Chem-Trend has been a global leader in the development of solutions for molding and casting process challenges. We have a singular focus on developing chemical specialties for processing. Because we are so focused, we can deliver exceptional value, performance and dependability in all we do.

**MANUFACTURING EXCELLENCE**

We are committed to excellence in all aspects of manufacturing. We are leaders in quality manufacturing practices, environmental standards and health and safety management systems. Our facilities hold the following certifications:

- ISO-9001
- ISO-14001
- OHSAS-18001

**GLOBAL LOCATIONS FOR LOCAL SERVICE**

As a global supplier singularly focused on mold processing solutions, we operate from offices, manufacturing facilities and distribution partners in all industrialized regions of the world, providing local sales and technical support wherever you need us.
INNOVATIVE SOLUTIONS
Chemlease® and ZyvaX® brands, offer a complete range of mold release systems developed to improve composites molding processes. By offering both Chemlease® and ZyvaX® brands, Chem-Trend is uniquely positioned to fully support the wide range of composites applications, including aerospace, automotive, construction, and industrial, marine, recreational goods, wind energy and more.

Our Chemlease® and ZyvaX® product lines include:
- **Release agents** Quality, cost, and efficiency depend on successful removal of the composite piece from the mold. Chemlease® and ZyvaX® semi-permanent water-based and solvent-based release agents offer excellent release of large, expensive, and intricate composite parts such as wind blades, boat hulls, and aircraft parts. Amongst our industry leading release technology we offer a product group that allows the user to choose from multiple levels of release and slip, even on the same mold.
- **Cleaners** Water-based and solvent-based Chemlease® and ZyvaX® mold cleaners thoroughly and safely aid the removal of mold buildup, including wax, silicone, contaminants, and resin, from pre-production and in-line mold applications.
- **Sealers and primers** Chemlease® and ZyvaX® sealers and primers work in unison with our release agents to protect your mold, offering enhanced surface finish and extended release film life. Chemlease® and ZyvaX® primers are available for gloss and matte surface finishes.

CONVENTIONAL TECHNOLOGY
